23	Blank		TBA		
24	Blank		TBA		
25	162.400	NONE	NONE	NONE	(or 162.550) Weather Channel

NOTES:

The above list is for the first 25 channels in your HT or mobile (single band or duo- band)

The UHF programming is on another sheet

The MARS ICE freq recommendation will allow us to move to a specific frequency or channel with the correct PL codes and offset info by calling it by "MEM CH" number

We will have a recommended plan for the UHF portion of your mobile or HT starting with MEM CH 26

There will be approximately 10 recommendations on UHF

Standardization of the ICE programming will help eliminate confusion in times of stress
